Mother Nature's Coming Attractions

The dates listed below have a high probability of **future weather problems**. On these dates, expect rain and thunderstorms during the Spring, Summer and Autumn months. During the wintertime, the precipitation may be in the form of **snow**.

Research to construct future Important Dates to Watch is ongoing. More often than not...these events will be followed by **strong northwesterly winds, clearing skies and cooler or colder temperatures**. A portion of this research will be used to construct future **long range weather calendars**.

KEY TO NUMBERS ABOVE {1} {2} & {3}

{1} These dates are associated with high energy cycles on the Sun. On occasion these dates may feature intense storminess.

{2} These dates are associated with specific locations of the Sun and Moon. Again, they may be associated with intense storminess, often followed by brisk northwest winds and cooler or colder temperatures.

{3} These dates have a planetary connection. During Spring, Summer and Autumn expect a higher probability of rain or even heavy thunderstorms, followed by strong northwesterly winds, clearing skies and briefly cooler or colder temperatures. (Cold Front Passage)! During winter expect light precipitation and a
